

# Monthly Conflict Incident Tracker

## Abia State - March 2016

### Background

This monthly tracker is designed to update Peace Agents on patterns and trends in conflict risk and violence, as identified by the Integrated Peace and Development Unit (IPDU) early warning system, and to seek feedback and input for response to mitigate areas of conflict.

### Patterns and Trends Dec 2015-Feb 2016

Most fatalities during this period were associated with pro-Biafra protests. According to Peace Map data (see Figure 1), February was the most lethal of the last three months. In January, several fatalities were reported in Aba when police allegedly opened fire on members of Indigenous People of Biafra (IPOB) and the Movement for the Actualization of the Sovereign State of Biafra (MASSOB), who were protesting the arrest of a popular pro-Biafran radio commentator. Then in February, multiple IPOB protesters were reported shot dead by the police during a rally in Aba South. In Ukwu West, security forces reportedly shot at IPOB members who gathered to pray at a public school, killing several. In an unrelated incident, the traditional ruler of Ikeala

Ahiaba community in Obingwa was reported assassinated on February 23.

Incidents reported in March included murder, vigilante/mob violence, cult-related violence, robbery, and assassination.

**Murder:** In Umuovo in Umuahia South, an 86-year old man and his 70-year old wife were reported murdered by suspected armed robbers who allegedly broke into their house at night to rob them.

movement. However, there has reportedly been a rise in gang violence and criminality in the state since January 2016, including several shootings and kidnappings. Also, now that the government has begun enforcing a ban on touting, peace actors should strive to ensure that youth do not resort to other criminal activities.
